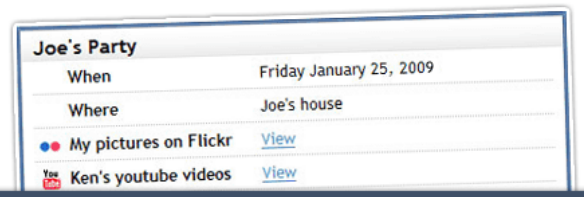
themetab.com beta

linking up your life



themetab is an **interactive system** that allows you to **group and categorize information** based on a theme.

interested? register for a free account! it's quick and easy.

need some ideas? you can organize:

- Your contact info (phone, e-mail, etc.)
- Screen Names for different services (AIM, Google Talk, ICQ, etc.)
- Links to your online profiles (MySpace, Facebook, etc.)
- Links to media sites you uploaded content to (YouTube, Flickr, etc.)
- Web pages by grouping your friends, coworkers, classmates
- Links about a particular topic or event (ex. birthday party or wedding)

help

Click here to see the initial "Getting Started" screen.

What are some ideas to put on the site?
-Your contact info (phone, e-mail, etc.)
-Screen Names for different services (AIM, Google Talk, ICQ, etc.)
-Links to your online profiles (MySpace, Facebook, etc.)
-Links to media sites you uploaded content to (YouTube, Flickr, etc.)
-Organizing web pages by grouping your friends, coworkers, classmates
-Links about a particular topic or event (ex. birthday party or wedding)

How do I get the icons to appear in a Section? Icons will automatically appear based on what you type in the "Label" section.
Click here to see the available icons.

AIM	BeBo	Del.icio.us	DeviantART
Digg	Eons	Facebook	Flickr
Fotolog	Freewebs	Friendster	Google Talk
Hi5	iGoogle	IMEEM	LastFM
LinkedIn	Live	LiveJournal	LiveSpaces
Multiply	MySpace	MyYearbook	NetLog
Netvibes	PageFlakes	Piczo	Reddit
Slashdot	StumbleUpon	Tagged	Technorati
Twitter	Typepad	WebShots	WebWag
Xanga	Yahoo	Yelp	YouTube

All of my Section are on one side; how do I get some back on the other side?
Add another Section on the side you want. Then reposition the Sections, using the new one was a "guide." Then delete the "temporary" (that you just added) Section.

How can someone link to content on a hidden Tab?
Temporarily "unhide" it, tell them to make the link, and then re-hide the Tab real quick.

What else can I do with "Add Section"?
You can be the one "in control" of a specific topic, then have all of your friends link to that to get the updated information. If you have great taste in [movie websites]: make a list, then have people link to it so they can automatically see your selections.

Can I edit a "shared" Tab?
You can only edit the setting for "Public" or not. If you have a link to someone else's tab, any changes they make to the Privacy will not affect you: if they suddenly make the page "Private," and you already had a link too it, you will still be able to see the Tab.
If you are the original author, you can change the name of the Tab. Everyone who has linked to your Tab will see the update.
